

# Our state-of-the-art storage bins:

Convenient, safe and friendly to your facility's environment.

Custom designed recycling programs from Central Machinery & Metals ensure scrap handling efficiency, environmental protection and maximum metal value returns. Leak-proof containers with drain valves allow cutting fluids to be reclaimed prior to shipment or recycled upon arrival at Central. Heavy-duty steel container lids provide security for materials stored outside.

## Leak-proof Indoor Containers are available in any size

Examples of commonly used sizes (shown at left):

- 44" length x 44" width x 31" height
- 46" length x 46" width x 43" height
- 66" length x 66" width x 45" height

Other indoor containers include:

- Lockable heavy-duty totes - ideal for storing scrap carbide and tool steel. Totes measure 25" length x 25" width x 28" height
- Self-dumping hoppers available in any size

## Leak-proof Lugger Bins with covers are available in two sizes

- 12 cubic yard: 12.66' length x 5.33' width x 6' height
- 20 cubic yard: 15.83' length x 5.33' width x 7' height

## Roll-off Containers with covers are available in five sizes

- 20 cubic yard: 16' length x 8' width x 5' height
- 30 cubic yard: 20' length x 8' width x 6' height
- 40 cubic yard: 20' length x 8' width x 7' height
- 50 cubic yard: 24' length x 8' width x 7' height
- 60 cubic yard: 26' length x 8' width x 8' height
